The educational game-based learning platform, Kahoot, provides user-generated quizzes that can be solved on the Kahoot app or the Kahoot website. Kahoot is a wonderful platform to check students' understanding of a certain topic in a fun and engaging way. With more than one billion players and the ever-increasing difficulty of quizzes, many players resort to using hacks and bots. Even though we don't support using cheats, you can use them on special occasions where necessary. Best Kahoot Hacks Everyone likes to succeed at whatever they do. Especially when it comes to competitive games. Sometimes people resort to cheating to win as well. Kahoot players often use cheats to win the quizzes. Whatever the intention may be, there are several ways to cheat in Kahoot, the best of them are listed below. Hacking Kahoot using Bots If you have a bit of programming knowledge, then you can easily use bots in Kahoots to win. First of all, you will need an account on Kahoot. You can use the Kahoot app or make your account on Kahoot.it website. After you have made your account on Kahoot, you will need to determine how many players are there in each game you are going to play or the quiz that you will take part in that the other users have created. After you have collected all the information, write the code so that when you are playing Kahoot with bots, no one can tell who is playing against them. However, you can be spotted if the bots generate an unusual number of responses within a certain period. But don't worry it won't happen very often because every bot generates a random number of responses if you use it correctly. Make sure that at least one person plays against the Kahoot bot in the game you are playing as you are going to use Kahoot with bots to get answers. These bots collect all data like the question number and time limit for each question. How to use the Kahoot bot Here is how you can use the Kahoot bot to hack the game First, visit the Kahoot Bot website Now enter the prefix in the given box as well as the game pin Click on the "Send" button Now you wait for the bot to send the request to the Kahoot game. The Kahoot bot will flood the game session you chose. These bots can be managed from the Kahoot website and you can remove them whenever you want. These bots have a spam option as well that can send a random number of bots. Best Kahoot Bots There are many Kahoot bots available online while most were created for views, some operate greatly as well. Here are the best Kahoot Hacks that are available for free online: 1. The Aidan Corbett Kahoot Bot This simple yet powerful Kahoot bot can put tons of bots at your disposal and correctly answer any question of any game you join on kahoot or quiz you take. You can find this bot here. How it works Open the browser and press enter to start. The bot will ask you for a random name. You can use any name you like or just use the nickname you use on Kahoot. Now enter the pin code of the Kahoot game you want to hack. Now in "bot count" enter the number of bots you want to send to the game. Enter the bot name and you're done. Pros This bot is very easy to use and delivers quick results. This bot is ad-free, which will save players a world of annoyance. This bot is virus-free, so gamers can rest easy without worrying about their data and system. If you want your name to be displayed as the winner on all your friend's devices, the bot will do that for you. While there are many pros of this bot, there are some cons that you should consider as well. Cons It needs a good internet connection to work and it might not work on every device. Many players use this for trolling purposes and to flood the game with bots. This disturbs the class and is morally wrong. 2. The Sean-3 Kahoot Bots No single question fails when you use this bot. The worst result you can get from this is a draw. You can get it here. How it works Visit the website and click on the play button. Press enter to start the bot. Enter a random name, or the one you are using on Kahoot. Enter the pin code of the Kahoot game you want to hack. Now enter the bot count and the bot name. The bot will now flood the Kahoot game with the bot name you used. Pros You can use this bot online, so you don't have to download it. This bot will always give you correct answers to every question. It can send up to 2000 bots per game. You can use this bot with various identities and it doesn't require you to sign up. Cons If you use too many bots, you might end up getting caught. Like the Aidan Corbett bot, the Sean 3 Kahoot bot also needs a stable internet connection to work. You might not always win using this bot. Most of your matches might end up in a draw. Hacking Kahoot using Chrome extensions There are many chrome extensions available online that one can use to hack a Kahoot game. When taking quizzes on your PC, add these chrome extensions and activate them. These extensions are only valid for the Kahoot website. 1. Pros This extension can help you change the number of points per question. It can get answers to a question automatically. It can also intentionally fail tests. Cons Due to it being dodgy, it gets constantly taken down by the chrome. However, as soon as it's removed, several alternates pop up. It is very buggy and can put your device at risk. This extension is very laggy so it might not be the best option if you are running short on time. 2. Kahoot Flooder/spammer Chrome extension You can fire up some random bots on the Kahoot website using this chrome extension. You can get this extension here. Pros This sends multiple answers to the questions in the game. It is available for free online. This extension uses the official Kahoot website to add players to your game. Cons This extension might not be compatible with every device. It opens up a lot of tabs and requires you to put pin code in each tab manually. This is very time-consuming and might slow down your computer. 3. Invisible Kahoot Names Using this chrome extension, you can hide your name and cover your answer area with your name. This extension is available online for free and you can get it here. Pros If you want to join Kahoot without anyone knowing, this is the best extension to use. It is compatible with every device and doesn't slow down your device. Cons Your progress might not be saved if you use this extension. 4. Kahoot Keys This extension lets you answer questions of the quiz without using a mouse. You can get this extension on the chrome web store here. Pros With this extension, you can use the first 4 numbers on the keyboard to give answers. It is a very fast tool and does not lag at all. Cons This extension won't help you win Kahoot games as it is more of like a helping tool. It doesn't work for Team Mode. Hacking Kahoot using Scripts, Keys, and Websites Advanced spammers use keys, scripts, and websites to hack Kahoot. 1. Mem-Rip / Kahoot Mem-Rip is very popular among Kahoot players. You can use it to spam and cheat on Kahoot quizzes and tests. This website allows you to flood Kahoot games with bots. 2.
